- **Databases:** MongoDB, PostgreSQL
- **Tools:** Git and GitHub
- **Concepts:** Data Structures and Algorithms, Object-Oriented Programming, Debugging, Authentication, REST APIs

Projects

BillFlow – E-Billing & Invoice Platform

Live Demo | GitHub Repo

- Developed a full-stack SaaS platform for invoice generation, client management, and revenue tracking with a modern serverless architecture.
- Built a dynamic invoice engine supporting custom quantitative fields, automated tax calculations, custom charges, and round-off handling.
- Migrated data storage from SQLite to Turso/libSQL and re-architected the application for deployment on Vercel serverless functions.
- Implemented stateless cookie-session authentication and a custom Single-Page Application dashboard using Vanilla JavaScript.

Zerodesk – Agentic Customer Support SaaS

Group Project

- Contributed to the development of a SaaS platform for automating customer support workflows using AI-driven task handling.
- Implemented authentication and tenant-based access control to ensure secure and isolated user interactions.

Coding Achievements

- Winner of CONVOKE Competitive Programming Contest, Cluster Innovation Center, University of Delhi (April 2026).
- LeetCode: Earned the Knight Badge and solved 850+ problems.
- CodeChef: Achieved 3 Star rating.

Leadership

Community Head, Chess Forum of ABES Engineering College

2025 – Present

- Leading and managing chess community activities and events.
- Encouraging student participation and strategic thinking through competitions and workshops.

College Ambassador, Chess.com

Sep 2024 – Nov 2025

- Represented Chess.com at the college level, promoting platform engagement and events.
- Coordinated activities to increase student participation in online chess initiatives.
